

EEP ECONOMICS Summer Reading

Due the Friday of the first week of school.

I'd like you to read **one** of the following and write a summary of main ideas and philosophies put forward in the book. Specifically focus on areas such as taxation, monetary policy, laws and regulations, governmental (fiscal) policy and the relationship between government and business. Make sure to include quotes and personal language to show me you have not simply read a summary. I will be looking for this. Length 3 pages.

Books:

The Road To Serfdom: F.A. Hayek
